Zeyad Elassad

Full Stack *Developer* & Software Engineer

Email: zeyadkassem83@gmail.com Web: zeyadelassad.dev GitHub: github.com/Zeyaddn LinkedIn: zeyad-elassad
Location: Mansoura, Egypt • Remote Worldwide

PROFILE

Independent Full Stack Developer building production web applications, educational platforms, fintech solutions and interactive platforms. I turn complex requirements into fast, accessible and maintainable systems using Next.js 14, React, Node.js and clean database structures. Currently freelancing — open to new projects, client contracts and full stack development opportunities.

TECHNICAL SKILLS

01 / FRONTEND
Next.js & React • TypeScript • Tailwind CSS • Bootstrap & SASS • Storybook

02 / BACKEND
Node.js & Express • PHP • REST APIs & JSON • Auth & role-based access

03 / DATA
MySQL • PostgreSQL • Schema design

04 / QUALITY
Responsive & RTL • SEO & performance • SCORM 2004 • Git & GitHub

SELECTED PROJECTS

The Muslim Platform
muslim-eight-iota.vercel.app

NEXT.JS 14 • REACT 18 • ADHAN.JS • PWA OFFLINE

Full Quran with audio recitations, prayer times with Adhan.js, a Qibla compass, an Athkar counter, Web Push notifications and offline support through a service worker.

Saudi LMS Platform
courses-sity.vercel.app

NEXT.JS • SCORM 2004 • STORYBOOK • RTL

SCORM 2004 compliant course delivery with separate student and admin dashboards, a responsive RTL interface for Arabic users, and a component library documented in Storybook.

FinTech Money System
fin-tech-money.vercel.app

NEXT.JS • TYPESCRIPT • TAILWIND CSS

A banking dashboard with account balance tracking, deposit and transaction management, filtered transaction history, invoice generation, and profile and settings.

Photography Portfolio & Booking
photography-seven-xi.vercel.app

NEXT.JS • BOOKING CALENDAR • JAVASCRIPT

Portfolio with story-style pages, a calendar booking system for client reservations, image protection with an overlay watermark, and performance scores above 85.

Al Bayt Charity Portal
albaytcharity.kesug.com

PHP • MYSQL • JAVASCRIPT • RBAC

Aid request submissions, document uploads, role-based access control, donor tracking, and case auditing for administrators — built for a live charity workflow.

TravelSphere
zeyaddn.github.io/TravelSphere

REACT.JS • FETCH API • FIGMA

API-driven destination discovery with instant filtering, tour schedules, dynamic cost calculation and reusable components, built from a Figma design system.

FreshFood Storefront

zeyaddn.github.io/FreshFood2

HTML5 • CSS3 • VANILLA JS

A lightweight grocery storefront with a live shopping cart, semantic HTML5 markup, responsive Flexbox & Grid layouts and micro-interactions — zero framework dependencies.

SERVICES

Full-Stack Web Platforms

Admin dashboards, LMS platforms and payment systems — from the interface down to the database and server.

High-Speed Landing Pages

Fast, responsive pages built to convert, with custom interfaces and search-engine-ready markup.

APIs & Database Architecture

Secure backends, third-party and payment integrations, and organized databases with fast queries.

Speed Tuning & Bug Fixing

Higher Lighthouse scores, immediate bug fixes, and compressed assets to lighten server load.

EDUCATION

Borg El Arab Technological University

2024 — PRESENT

IT Department • Alexandria, Egypt

Studying IT while building production full stack platforms in parallel with coursework.

WE Applied Technology School

2021 — 2024

Programming Department • Mansoura, Egypt

Foundations in relational databases, PHP and OOP. Graduated 2024 with an IT specialization.

Languages: Arabic (native) • English (professional)

Available for freelance projects & technical contracts
