Zeyad Elassad

Full Stack Developer & Software Engineer

Email: zeyadkassem83@gmail.com Web: zeyadelassad.dev GitHub: github.com/Zeyaddn LinkedIn: zeyad-elassad
Location: Mansoura, Egypt • Remote Worldwide

PROFILE

Full Stack Developer with hands-on experience delivering production web applications, educational platforms, fintech dashboards and interactive products. I specialize in turning complex requirements into fast, accessible and maintainable systems with Next.js 14, React, Node.js and well-structured databases. Available for freelance projects and full stack contracts.

TECHNICAL SKILLS

01 / FRONTEND
Next.js & React • TypeScript • Tailwind CSS • Bootstrap & SASS • Storybook

02 / BACKEND
Node.js & Express • PHP • REST APIs & JSON • Auth & role-based access

03 / DATA
MySQL • PostgreSQL • Schema design

04 / QUALITY
Responsive & RTL • SEO & performance • SCORM 2004 • Git & GitHub

SELECTED PROJECTS

The Muslim Platform
muslim-eight-iota.vercel.app

NEXT.JS 14 • REACT 18 • ADHAN.JS • PWA OFFLINE

Built an offline-first Islamic platform: the full Quran with audio recitation, Adhan.js prayer times, a live Qibla compass, an Athkar counter and Web Push notifications.

Saudi LMS Platform
courses-sity.vercel.app

NEXT.JS • SCORM 2004 • STORYBOOK • RTL

Delivered a SCORM 2004-compliant LMS with separate student and admin dashboards and a fully RTL Arabic interface, backed by a Storybook component library.

FinTech Money System
fin-tech-money.vercel.app

NEXT.JS • TYPESCRIPT • TAILWIND CSS

Designed a TypeScript banking dashboard that unites balance tracking, deposits, filtered transaction history and invoice generation in one clean interface.

Photography Portfolio & Booking
photography-seven-xi.vercel.app

NEXT.JS • BOOKING CALENDAR • JAVASCRIPT

Developed a Next.js portfolio with story-style pages and a calendar booking flow, adding image protection and keeping performance scores above 85.

Al Bayt Charity Portal
albaytcharity.kesug.com

PHP • MYSQL • JAVASCRIPT • RBAC

Built a PHP and MySQL charity portal for aid applications, document uploads and donor tracking, with role-based access control and an administrative audit trail.

TravelSphere
zeyaddn.github.io/TravelSphere

REACT.JS • FETCH API • FIGMA

Created a React app for destination discovery with instant API filtering, tour schedules and dynamic cost calculation, built from a Figma design system.

FreshFood Storefront

zeyaddn.github.io/FreshFood2

HTML5 • CSS3 • VANILLA JS

Built a lightweight grocery storefront with a live shopping cart and no framework dependencies, using semantic HTML5, CSS3 Grid/Flexbox and vanilla JavaScript.

SERVICES

Full-Stack Web Platforms

Admin dashboards, LMS platforms and payment systems — from the interface down to the database and server.

High-Speed Landing Pages

Fast, responsive pages built to convert, with custom interfaces and search-engine-ready markup.

APIs & Database Architecture

Secure backends, payment and third-party integrations, and organized databases with fast queries.

Speed Tuning & Bug Fixing

Higher Lighthouse scores, immediate bug fixes and compressed assets that lighten server load.

EDUCATION

Borg El Arab Technological University

2024 — PRESENT

IT Department • Alexandria, Egypt

Studying IT while building production full stack platforms alongside coursework.

WE Applied Technology School

2021 — 2024

Programming Department • Mansoura, Egypt

Foundations in relational databases, PHP and object-oriented programming. Graduated 2024 in the IT track.

Languages: Arabic (native) • English (professional)

Available for freelance projects & technical contracts
